

Energy Blanket

The origins of this technology go as far back as the long disappeared civilizations of ancient Shumer, Egypt, Babylon and Assyria.

Dr. Wilhelm Reich believed that there is a certain life energy, which he termed “orgone”, which circulates in a human being.

As an orgone accumulating device, he used a wooden box with its sides proportional to the dimensions of the Ark of the Covenant.

The modern Russian's version of the Ark of the Covenant has been implemented as a blanket with embedded screens made of synthetic membranes known as the Therapeutic Multilayer Blanket (Energy Blanket).

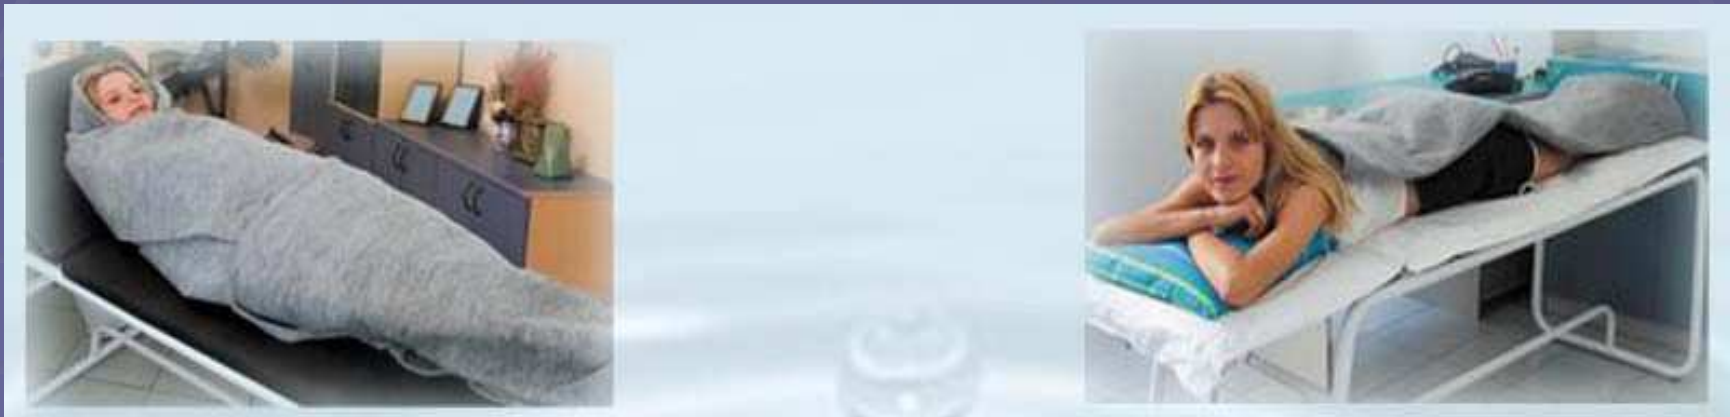

- **The Healing Energy Blanket unique composition contains reflective metallic material similar to that used in the lining of the astronaut suits for protection against potentially harmful electromagnetic fields.**
- **In addition, the Blanket has other health benefits, because it works as an energy mirror, reflecting the body's natural radiation back and showing the body its 'energetic portrait'.**
- **The body corrects its imperfections, by rebalancing and restoring the harmony and beauty of its natural energy flow, gradually improving the state of health.**
- **The body regains its natural healing powers, returning to the path that was so evident in our youth, when our self-recovery ability was its strongest.**

Consider the benefits:

- a. **Immediate reduction of stress and tension (mental or physical) and sleep improvement;**
- b. **Repeated use strengthens the immune system and increases resistance to seasonal infections and allergies;**
- c. **Reduces recovery period from traumas, injuries, surgery, and common illnesses and enhances the effect of any medication, as well as shortens long-term disability claims.**
- d. **Increases brain wave activity thereby enhancing mood and one's outlook.**

- e. Safe to use with no complications, contraindications or side effects.
- f. Can be a stand-alone treatment or combine with other therapies, fitness or wellness programs.
- g. Portable, user friendly and durable product that requires little training.
- h. Environmentally friendly with no power source.
- i. Excellent for use at home, in a workplace lounge, fitness centre, or at a workstation.

How Does it Work?

Based on original work by Wilhelm Reich, the Energy Blanket was developed to help to induce the body and mind to rest, recover and re-energise.

The Energy Blanket works essentially by reflecting away external energies that may be influencing the body and also by reflecting back to itself the body's own energies.

The blanket is used for helping the body to energetically re-compose itself. The Energy Blanket is widely used by itself and also recommended for use together with SCENAR therapy treatments.

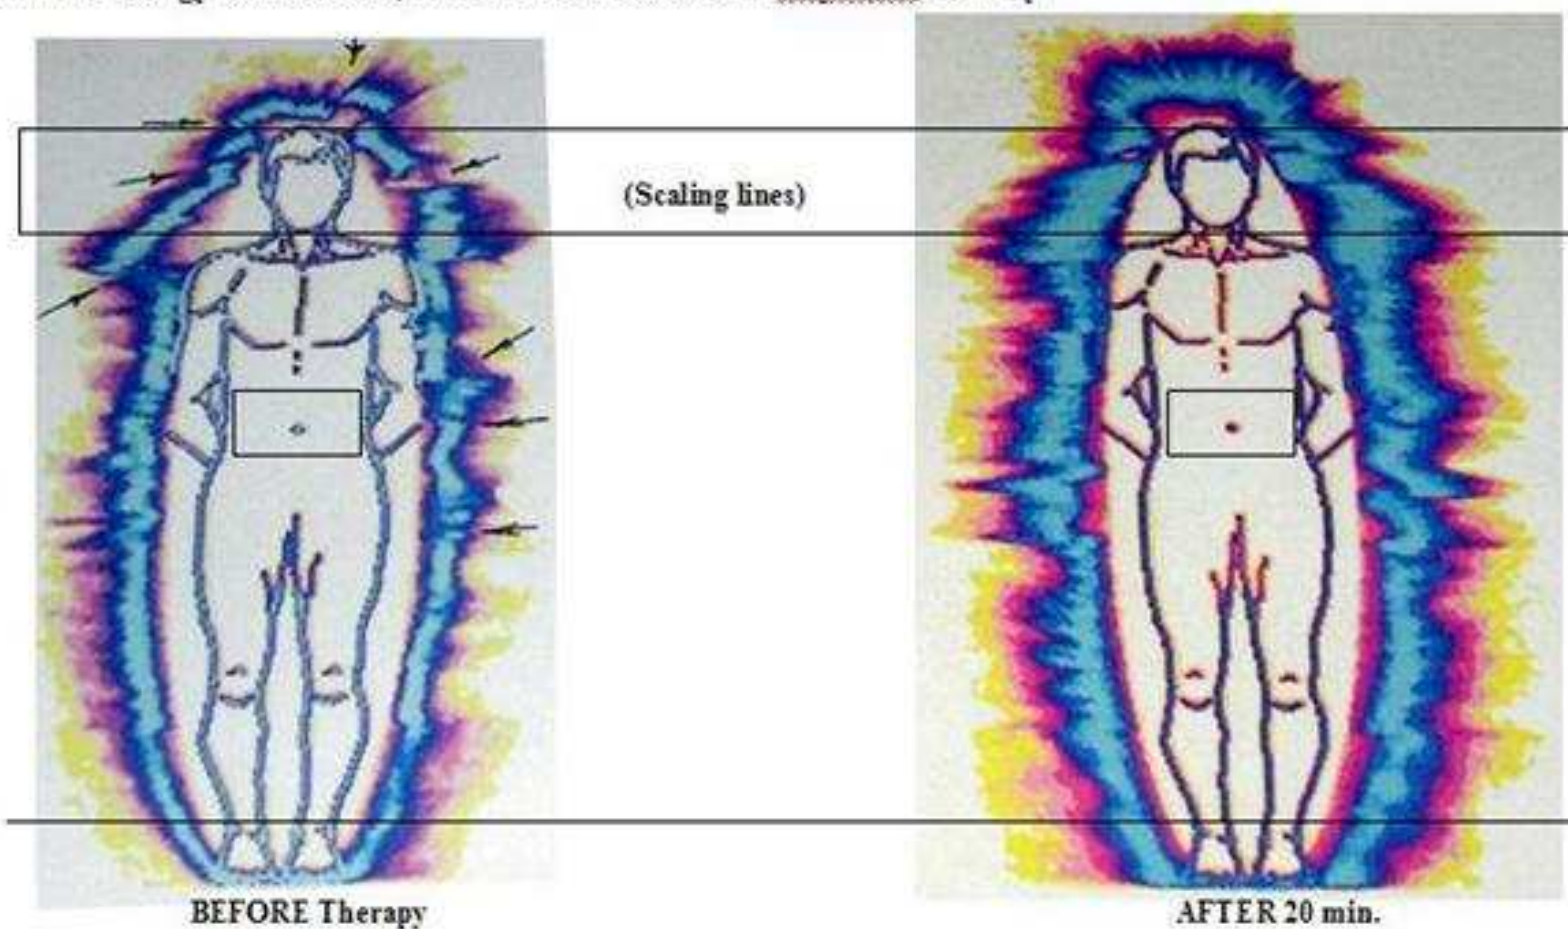

The effects of the Energy Blanket are reportedly achieved through the reflection of the patient's own infrared and ultra-high frequency emissions back onto their body. A special membrane composed of several layers inside the blanket is designed to prevent the body's electromagnetic emissions and Infrared radiation from dissipating outwards.

Solaris Blanket Therapy Effects

Aura photo taken with Kirlian photography

Good indicator of biophoton density

- 67 Year old client was wrapped in Solaris Blanket for 20 minutes.
- Energy is reflected, concentrated and rebalanced back into the body.
- Emitted energy is increased, indicative of increase in biophoton activity

To use Energy Blanket, simply wrap yourself in it!

Energy Blanket can treat and cure you of many diseases, rehabilitate and prevent diseases, relieve from stress, depression and chronic fatigue, etc. And this is by far not all what they can do.

It takes only 20 to 40 minutes of soothing comfort in a relaxed environment.

Energy Blankets are used to:

- **save and strengthen your health**
- **prevent diseases**
- **treat diseases and disorders**
- **rehabilitate patients, aged people, disabled people and incurable patients**
- **increase the effectiveness of combined treatment**
- **decrease side effects**
- **reduce drug doses**

PRINCIPLES OF ACTION OF THE SMALL BLANKET (SB)

- **The principle of the actions of the SB is based on the fact that the wrapping part of the body of the patient formed individual-specific environment with the factors of the physical nature (electromagnetic shielding and electrostatic fields, electromagnetic radiation of his own reflection, the redistribution of free electric charges on the surface of the skin):**
 - **Full protection or weakening of the external electrostatic and electromagnetic fields;**
 - **Impact on the patient his own reflection of electromagnetic radiation of infrared (IR);**
 - **Impact on the patient his own reflection of electromagnetic radiation of extremely high frequency (EHF);**
 - **More even distribution of free electric charge on the surface of the skin of the patient (is due to the presence of the body of free electric charge and the screening of the external electrostatic field).**

CONTRAINDICATIONS

- Acute myocardial infarction.
- Circulatory deficiency (type III).
- Hemorrhagic insult.
- Acute and chronic haemorrhages.
- Tendency to haemorrhages.
- Unconsciousness.
- Coma state.
- Idiopathic fever.
- Frequent epileptic attacks (4-6 times per week).
- High susceptibility to convulsions.
- Acute hallucinosis, acute delirious psychosis.
- Individual intolerance.

Energy Blanket is strictly contraindicated in cases of severe peptic ulcers, acute ulcer episodes, malignant peptic tumor, internal abdominal bleeding or possibility of abdominal hemorrhage.
